**3-PLY MEDVISOR™ SYSTEM**

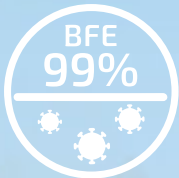

**MEDVISOR**™  
medical and safety equipment

DESIGNED TO PROTECT 

According to tests performed  
on the **MEDVISOR MASKS**  
We can proudly say that our product  
has best quality!

### **BACTERIAL FILTRATION EFFICIENCY- 99%**

The Medvisor medical face mask provides an excellent barrier against bacteria. BFE test allows to examine the resistance of fabrics on penetration bacteria within all the layers of our product. Test results clearly indicate that the Medvisor face mask is the product with the best protection against bacteria

### **PARTICULAR FILTRATION EFFICIENCY- 99%**

The Medvisor medical face mask provides an excellent protection against dust, particles and micro-organisms, which are dangerous for the respiratory system of human. As a result of the research, we know that our Medvisor medical face mask prevents a barrier not able to pass for any kind of micro-organisms.

### **POSITIVE ELECTROSTATIC CHARGE**

MELT-BLOWN, middle filtering layer is the fabric with positive electrostatic charge, which is the special protective barrier in the Medvisor medical face mask. Due to positive electrostatic charge, Our face mask pushes back all kind of principle: micro-organisms, viruses, bacteria.

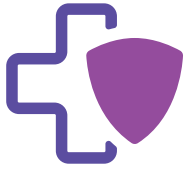

### **THE RESISTANCE AGAINST LEAKING OF LIQUIDS**

The Medvisor medical face mask provides safety and protects against penetration of different kind of liquids: blood, saliva, chemical substances and biological origin substances.

### **GREAT AIR PERMEABILITY**

Despite of many protections against penetration of unwanted substances from outside, the Medvisor medical face mask consists the structure which allow to breathe comfortably. Inhalation and exhalation are also without any problems. What is more, the unique structure prevents misting-up glasses and eliminate the feeling of wetting mouth and nose
